

Policy and Plan/Programme Model

Policy and Plan/Programme Model

All policies and plans/programmes that have to be submitted as part of the Green Star SA Performance Rating Tool have to be developed in line with the Green Star SA Policy and Programme Model as outlined below. Policies and Programmes/Plans in Green Star SA outline clear organisational commitments to overall sustainability goals and actions, which are designed to ensure that these can be implemented at the operational level. A Green Star SA policy or programme/plan clearly sets out the parameters for implementation and must be aligned to the model set out in this document.

Although it is not necessary for organizations seeking certification to develop separate policies, projects are required to highlight and where not present in existing policies, amend existing policies and include the following elements:

Policy and Plan/Programme Model

Item	Description	Policy	Programme/ Plan
Purpose	Outline of the intent, goals and purpose	✓	✓
Scope	Describe the facility management and operations processes to which the policy/programme/plan applies.	✓	✓
	Describe the building components, systems and materials to which the policy/programme/plan applies.	✓	✓
	Describe the physical or programmatic boundaries of the plan/programme		✓
Goals and Policy Rules	Clearly identify the sustainability goals and targets	✓	✓
