Predicted Savings of EDGE Certification

55.94%

Energy Savings

26.21%

Water Savings

28.22%

Less Embodied Energy in Materials

Technical Solutions

Energy

Window to Wall Ratio, Insulation of Roof, Insulation of Ground/Exposed Slab, Insulation of External Wall, Efficient Glass, Efficient Water Cooled Screw Chiller, Efficient Electric Resistance Heating System, Additional Energy Saving Measures

Water

Low Flow Showerheads, Low-Flow Faucets for Private Bathrooms, Low-Flow Water Closets for Private Bathrooms, Low-Flow Faucets for Kitchen Sink

Materials

Bottom Floor Construction, Intermediate Floor Construction, Floor Finish, Roof Construction, Exterior Walls, Interior Walls, Window Frames, Window Glazing, Roof Insulation, Wall Insulation, Floor Insulation

* Part of the energy efficiency percentage may be associated with virtual energy for comfort depending on the presence of heating and cooling systems. Note that virtual energy does not contribute savings to utility bills.

Bottom Floor Construction, Intermediate Floor Construction, Floor Finish, Roof Construction, Exterior Walls, Interior Walls, Window Frames, Window Glazing, Roof Insulation, Wall Insulation, Floor Insulation

*Part of the energy efficiency percentage may be associated with virtual energy for comfort depending on the presence of heating and cooling systems. Note that virtual energy does not contribute savings to utility bills.
